-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This action is in response to applicant's amendment received on 02/28/05.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perrone (5,669,277) in view of Saitoh et al. (6,241,234).

Perrone discloses the invention substantially as claimed including a sheet punching device, die holes 44, a plurality of punch trains (Fig. 1 and 2), a plurality of punches 42, a first rotatable shaft 16 and a second rotatable shaft 18. Perrone does not show an initial position detecting sensor and a sheet end detecting sensor. However, Saitoh teaches the use of an initial position detecting sensor 71 and a sheet end detecting sensor 31 for the purpose of accurately punching the sheet at a predetermined position. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Perrone's device by providing the initial position detecting sensor and the sheet end detecting sensor as taught by Saitoh in order to obtain a device to accurately punch the sheet without stopping the sheet.

Response to Arguments

4. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Perrone does not show to "selectively use one train of the plurality of punch trains to cut holes in the sheet". However, Perrone teaches in Fig. 1 the use of one of the plurality of punch trains cutting holes 36 in the sheet 38. Also, Perrone discloses the desire of select any one the format for achieving registration can be found in the Abstract. Since Perrone discloses the desire to select any one format (the plurality of punch trains) Saitoh et al. does not need to disclose it to be combinable. Saitoh teaches the detecting sensor 71 and the sheet end detecting sensor 31 to set the initial position of one punch train similar to applicant's invention that use one sensor 562 to determine the initial position of one punch train.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 571-272-4507. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
